As the pandemic situation in Indonesia had shown improvements, the government has now relaxed travel restrictions to enter Indonesia.

In addition to topping the latest list of Nikkei's Covid-19 Recovery Index in South East Asia, the positivity rate at under 0.5% is also way below WHO's 5% mark of a low-risk Level 1 country.

With the new year fast approaching, those who are looking to start investing in Indonesia, set up a business and/or expand, could perhaps use this momentum to explore possible business opportunities.

In light with this, Jakarta Land and Vistra Indonesia will be hosting a webinar on investment outlook (post pandemic), immigration and expatriate regulations, border opening and travel, and pay-roll solutions (outsourcing) among other things.

Scan the QR and register yourself before November 26.

Yours trully,
the community editor
