

# INSIGHT

WTC COMMUNITY WEEKLY

## ***New Health App Incoming!***

Everyone, bid goodbye to PeduliLindungi and say hello to Satu Sehat Mobile.

The COVID-tracing app is currently being transformed by the Health Ministry with a wider function and new sets of features, including a connection system to a wearable device.

Users will collect points as they walk and can redeem the points for vitamins and the likes. It will also allow users to access their medical history, vaccination records, lab examination results and cardiology.

Given these broad benefits, the ministry's Chief of Digital Transformation office, Setiaji, urged the public not to uninstall their Peduli Lindungi app. He also reassured that it has passed an assessment from the National Cyber and Crypto Agency (BSSN).

The newly improved app is expected to be launched on February 28.
