World Art Day

It is said that just like beauty, art is in the eye of the beholder. And everyone will have their own interpretation to it.

Art nurtures creativity, innovation and cultural diversity for all peoples across the globe and plays an important role in sharing knowledge and encouraging curiosity and dialogue. These are qualities that art has always had, and will always have if we continue to support environments where artists and artistic freedom are promoted and protected.

Which is why, World Art Day was proclaimed at the 40th session of UNESCO's General Conference in 2019. Each year, on 15 April, World Art Day celebrations help reinforce the links between artistic creations and society, encourage greater awareness of the diversity of artistic expressions and highlight the contribution of artists to sustainable development.

Speaking of art, Jakarta Land is proud to present RITME, an Islamic art exhibition. The exhibition features seven artists and seeks to explore the concept of rhythm, its connection to the natural world and its impact on our emotions and spiritual well-being. RITME is displayed at WTC 3 lobby area and available to view online on jakland.com/art-at-wtc.

Yours truly,
the community editor
