Your drop makes a difference!

Friday,
26 January 2024
9 AM – 12 PM
WTC 3
Conference Hall

Get your registration form at Jakarta Land's office
on 15-19 January 2024 at 10 AM to 3 PM
First come, first served!

A GREENER WTC

If you look around the WTC Complex, you'll see plenty of green, open spaces with perfectly manicured trees and bushes. When you're entering the buildings, you'll find designated bins for trash, paper, plastic, and cans.

Our retail outlets are also encouraged to ditch single-use plastic and opt for recycled and biodegradable materials.

All of these are parts of our commitment towards sustainability and a greener tomorrow. And we are proud to introduce you to our latest sustainable effort: eco planter box and Driver's Waiting Area!

The ten benches were crafted from 544 kilograms of plastic waste collected from the Complex. These elements symbolize our dedication to environmentally conscious practices and transforming waste into functional assets while reducing our environmental impact.

This eco-friendly space is located at the back of WTC 1, next to Gate B Vehicle.

Yours truly,
the community editor
