## VIRTUAL GOLF

Back in the day, golf is one of those sports that feel exclusive and expensive. Now, it is increasingly popular among all generations, especially post-Covid where people looked for recreation options with minimal physical contact and activities in crowds. This is where virtual golf comes in.

Virtual golf is a simulated golf game that allows you to play golf on your computer or mobile device. It uses motion sensors to replicate the feel of swinging a golf club, and has the same goal and basic rules as the real thing.

It allows you to play on your own schedule, at your own pace, both indoors and outdoors, and at any time of the year - saving you time and money in the process.

If you wish to test yourself and play a round or two, swing by this Thursday for a try-out. This event is free and open for all WTC tenants.
