3 TIPS TO KEEP A HEALTHY HAIR AT HOME

1. Regular hair wash, once every other day is generally fine
2. Use suitable treatments for your hair needs
3. Limit hairdryer use, only when necessary and avoid rubbing too hard on towel as it can cause damage and split ends

The Crown Jewels

When was the last time you went to a salon or a barbershop to get a haircut?

Ever since the first lockdowns, the continued PSBBs, PPKMs and what not, I think I've only went twice.

The chance to work from home is definitely a big factor as we try to avoid crowds and queues. Of course, there's the convenience of a home service but it's not the same thing as going out to the get your hair done.

But now that PPKM's been downgraded to Level 3, more relaxations are put in place. So if you happen to start working back from the office again, or just so happen to be in the neighbourhood, come pamper yourself with a hair treatment at WTC 2's Haircode and keep that crown jewels of yours shine.

Yours trully,
the community editor
