WTC COMMUNITY WEEKLY

Rumah Sakit Royal Progress is offering a drive thru antigen and PCR tests, lab, vaccine and other medical services until June 2022

Head to the upper floor of the double deck car parking. Open from Monday to Saturday, from 8 AM - 7 PM

COVID-19 BOOSTER JAB

The Indonesian government has kicked off its Covid-19 booster vaccination program last Wednesday, targeting 21 million recipients across 244 cities/regencies in January.

As per WHO's guideline, only those who are over 18 years of age are allowed to receive the shot. Other criteria include a minimum of six months after the second dose and he/she must live in a city/regency where vaccine coverage has reached 70% for first dose and 60% for second dose.

For booster, Drug and Food Supervisory Body (BPOM) has released Emergency Use Authorization (EUA) for five different vaccines: CoronaVac, Pfizer, AstraZeneca, Moderna and Zifivax.

The government is currently formulating three options for the program: government aid, premium assistance beneficiaries (PBI) and private pay.

Booster jabs will be prioritized for health workers, the elderly, PBIs, and immunocompromised groups.

Yours truly,
