

INSIGHT

WTC COMMUNITY WEEKLY

Up the Stream

2020 had put filming and movies release dates on hold much to everyone's disappointment, especially for a *cinophile*.

Fortunately, this year, some studios are getting creative by releasing films on streaming at the same time as they'll hit theaters. This way we'll still be able to enjoy all the blockbuster movies at the comfort of home.

Unsurprisingly, app-based VOD (video on demand) platforms are getting increasingly popular in times like this. It's cheaper, safer, and has plenty of options.

There are at least 10 available in Indonesia, some even offer daily package and free trials. Subscription charge varies, starting as low as US\$ 2.

Yours trully,
the community editor
